

BlackBerry „OTASL – Over the Air Software load “

Available over the Air Firmware Upgrade paths for A1 Customers

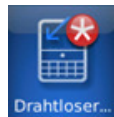

Since October 2009 A1 provide OTASL (Over the Air Software Load) to their BlackBerry Customers. With OTASL A1 offers his customers the opportunity to upgrade their BlackBerry devices over the air through the wireless carrier network or WIFI.

Unlike to the upgrade with BlackBerry Desktop Manager, where you need to install the full Software package, OTASL just downloads and installs a set of delta binaries needed for the upgrade to the target firmware version.

There are two ways to upgrade your device:

1. Provider/Carrier initiates the update by upgrade notification pushed to the BlackBerry device. This is done by the mobile carrier.

notification-icon:

2. Customer initiates the upgrade from the device:

➤ Settings > Device > Software update

Here you can find a video showing the whole procedure:

http://www.youtube.com/watch?v=BHXPDaKX18U&feature=player_embedded

IMPORTANT: For BlackBerry Enterprise activated devices the BlackBerry Enterprise Administrator has to permit OTASL for the BES Users over „BES IT-Policy“.

List of available BlackBerry upgrade paths for A1 customers

NOTE: we provide only firmware versions which achieved technical acceptance due to A1!
